8. **Contractors Employees:** - The contractor shall employ & provide only such employee who is skilled & experienced for execution & it supervision of work. He shall make suitable arrangement for accommodation of his employees.
9. **Procedure Of Painting:**
 - a. Remove the thick scales of rust on the metal surface with mild hammer strokes and clean out the surface thoroughly by scratching with metal shrapnel's and steel-wire brushes. Then remove the loose rust particles on the metal surface by rubbing with sand paper & dry cloth. Remove the stains of grease or oils, if any, on the metal surface.
 - b. Make sure that the cleaned metal surface is completely dry before application On the clean and dry metal surface, first give a coating of special Primer or a suitable Asian make red oxide and allow to dry for one day.
 - c. Shake the Compound i.e. Asian make synthetic enamel paint of light grey paint of grade 631 in the container very well. Give two even coatings of the material with nylon brushes.
 - d. The final coating, however, produces a total hiding of the lower surface. While giving the coatings, do not unduly rub the brush for a long time over the same spot. This leads to the formation of plastic fibers on the brush which disturbs the coating with the pulling effect. To avoid fibers again take a little fresh material or thinner on the brush and make an even coating.
 - e. The inner walls of radiator fins should be treated carefully & without any damages to radiator main tank of TF.
